

Ékleipsis

The ancient Greeks called it ékleipsis — the moment when the Sun seemed to abandon the sky. For the civilisations that sailed the Mediterranean, an eclipse was far more than an astronomical phenomenon; it was an extraordinary event, capable of inspiring myths and making time stand still.

As dusk falls over the horizon of Benidorm, the Moon will cover almost the entire Sun. While the sky unfolds one of its most extraordinary spectacles, every detail has been thoughtfully curated to accompany an experience that will linger long in the memory.

LA TERRASSE

BY PORT HOTELS

MENÚ

Ékleipsis
