

COMMITTED TO THE PLANET

Port Europa Implements an Innovative System to Reduce Food Waste

At Hotel Port Europa, we continue to advance our commitment to sustainability and the efficient use of resources. As part of Port Hotels' environmental strategy, "Guests of the Planet", we have introduced a new food waste monitoring system in our kitchens.

This innovative system uses smart digital scales that collect real-time data, allowing us to measure and analyse food waste accurately. With this information, we can identify critical points, apply continuous improvements, and reduce environmental impact by optimising resource use.

The project aligns with the principles of THE PLEDGE on Food Waste, an international platform that promotes best practices in preventing food waste. Through this initiative, we actively contribute to the United Nations Sustainable Development Goals, particularly SDGs 2, 12, 13 and 17.

Beyond technology, the programme encourages the involvement of our entire team and guests, fostering a shared culture of sustainability. Because every small action counts when it comes to caring for the planet.

With this initiative, Hotel Port Europa strengthens its position as a leader in sustainability within the Port Hotels group, reinforcing its commitment to responsible innovation and environmental protection.
